

WESTERN PACIFIC RAILROAD
STEAM LOCOMOTIVE No. 165

The Western Pacific Railroad Steam Locomotive No. 165 is a 2-8-0 type locomotive. It was built by the Baldwin Locomotive Works in 1911. The locomotive is currently on display at the Western Pacific Railroad Museum in Reno, Nevada. It is one of the largest steam locomotives in the world. The locomotive is currently in the process of being restored to operating condition. It is expected to be ready for service in the near future.
